

## THE NEW FREDRIVE MOUNTED ON A MOBILE LIFTING COLUMN

The new FreDrive makes the dream of its users come true: Adapt your production to different quantities and milling processes in record time!

THE NOVELTY: A new milling concept (5 milling heads – 3 different processes – one system) allows new ways of product treatment. The new FreDrive is mounted on a lifting column and meets all the standards of the pharmaceutical industry. Its user simply docks the mill to a spot of his choice in the production room and chooses the right height by pushing a button. FreDrive can be integrated as closed or open system in existing or new equipment's. It is available for ATEX Zones 0/20 and 1/21 and delivers a wide range of production possibilities at lowest costs.
