EASYMILL DM-200

High performance milling machine with high production but simplified drive. In a single step, the EasyMill DM-200 mills bulk goods that have hardened and formed lumps as large as 60 cm over time to finenesses of up to 250 µm.

Hard products and lumps as large as 60 cm are reduced to a fine-flowing powder in a single step. Its construction guarantees significant advantages and it can be used as a stand-alone unit for batch production or for continuous operation.
