

Frewitt acquires Nortec Pharma expanding Product Range and Services to Customers

Frewitt Fabrique de Machines SA Switzerland, leader in the development of material handling processes, as well as the manufacturing of premium quality mills announced that it has acquired Nortec Pharma, Poland, an engineering company renowned in designing customized solutions for the pharmaceutical industry.

Since 1946, Frewitt has built a solid reputation as a supplier of high-quality products, always placing its priority on providing optimal process solutions by delivering cutting-edge milling, sieving, homogenizing, deagglomerating, conveying, dosing and filling systems for powders, granulates and suspensions of every type.

Mr. Antoine Virdis, CEO of Frewitt explained, “This acquisition marks a major milestone in Frewitt’s development. It testifies to our commitment to innovation, and our determination to strengthen our offer of turn-key solutions, our services, and proximity to our customers, while enhancing our position as one of the market leaders”.

By expanding Frewitt’s presence in Europe

through this acquisition, the company will not only diversify and increase its product portfolio, Frewitt will also be better able to leverage trans-European synergies of additional supply chains, technology development, and partnerships, which benefit the company’s European and international customers.

For the companies’ leadership, this acquisition is much more than a simple transaction. It represents a melding of two cultures, two histories, two technology driven teams who share the same values and the same ambitions. Both are convinced that this union will create an extraordinary synergy, a catalyst for growth, while providing greater benefits for customers, and ensuring continued success in the years to come.

Mr. Pawel Chrzanowski, CEO of Nortec Pharma stated, “the combined forces of Frewitt and Nortec will boost the growth

and development of the company, benefiting from the expanded product range and world-wide sales network.”

“Together, we begin to pen the next chapter in our long history, one marked by innovation, growth, and a renewed focus on our customers. We will continue to invest in our people, our technology, our infrastructure, and our core-values, to remain at the forefront of the industry. We will also reaffirm our commitment to our customers by offering them ever more effective products and services tailored to their needs” concluded Mr. Virdis.

About FREWITT

Benefiting from over 75 years of experience in the grinding and milling of powders, Frewitt has established itself over time as a leader in this field by constantly anticipating the needs of its markets, including pharmaceuticals, fine chemicals, foods, and developing its machinery and processes accordingly. Its worldwide presence – a global HQ in Switzerland, with worldwide presences in the USA, Germany, India, China, and now Poland as well as local representation in over 50 countries – enables FREWITT to be as close as possible to its customers.
